NEW ALUMINUM PROFILE AL 23 COMBI

New aluminum profile AL23 COMBI was developed to integrate KEY Light system to the gypsum board.

It is functioning with LED LR18 and LR19 + diffuser VEC-4. This profile is multifunctional as it enables to combine gypsum and stretch ceiling in one profile. VECTA COMBI system allows to create an unique accent lighting effect in interior design and can be used with gypsum board, stretch ceilings or even combining both. Integrated LED lighting is 30mm wide and can be used in creation of endless glowing line effect.
